

Spark AI

Spark AI is the AI performance partner that builds organisation-wide AI capability for agencies and brand teams.

- * Worked with 80+ agencies and brand teams since 2024
- * Lecture at Oxford University Business School
- * Bestselling book: Shift – AI for Agencies
- * Ex-agency AI coaches

ABOUT

What we do

Spark AI is the AI performance partner that builds organisation-wide AI capability for creative agencies and brand teams.

Ways to work with us and why

1. [Know where you stand](#)
2. [AI Foundations](#)
3. [AI Accelerator](#)
4. [Agent Build Sprint](#)
5. [Spark Frontier](#)
6. [Why Spark – our creds](#)

Know where you stand

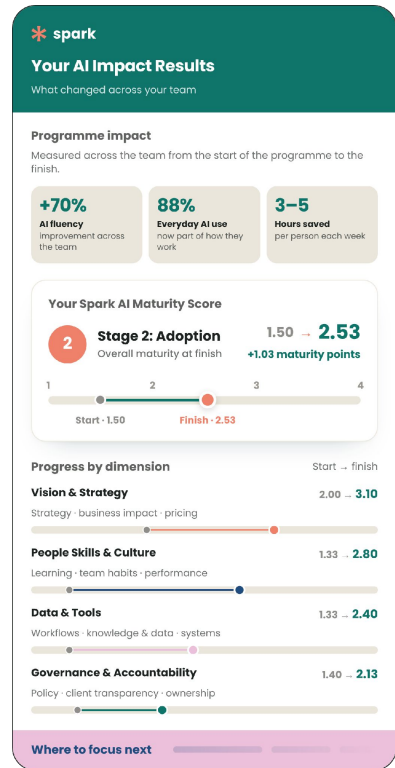

THE SPARK AI MATURITY SCORE™

Spark AI Maturity Score™

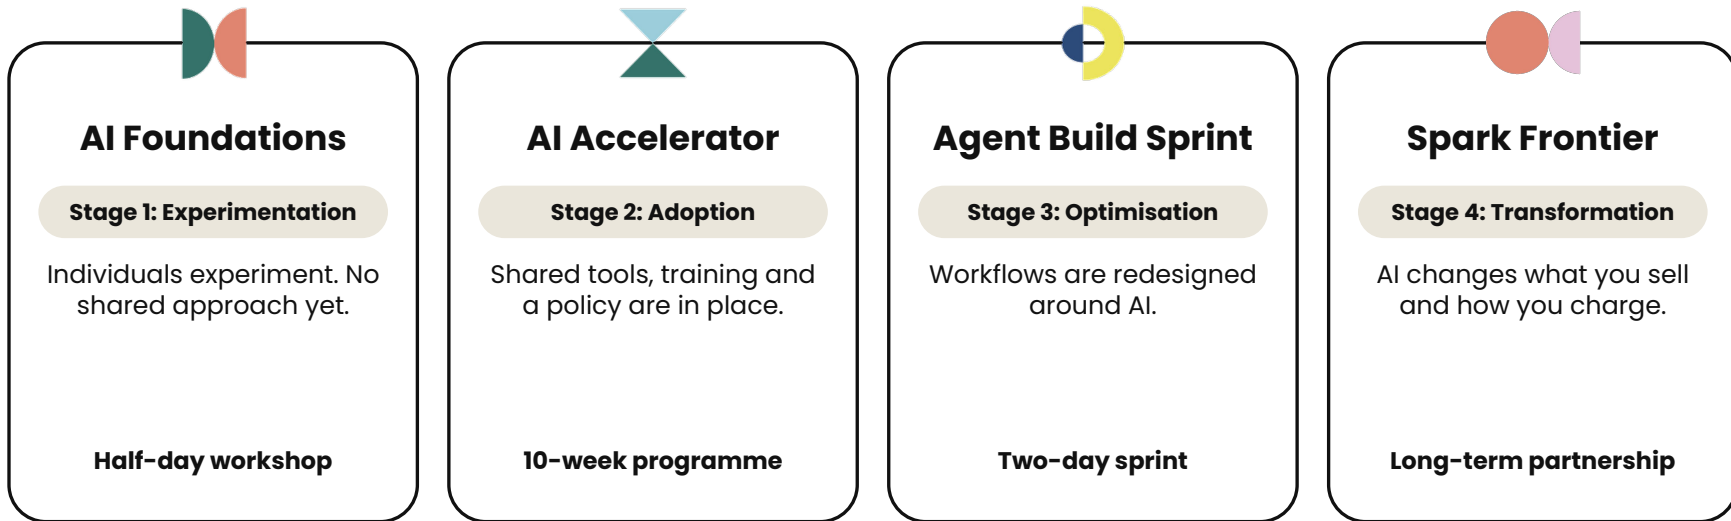

The Spark AI Maturity Score™ is our free AI benchmarking tool, built on the Spark AI Maturity Model® and backed by two years of data from 80+ agencies and brand teams.

Take it now. Answer 12 questions and get your score, what you're doing well, where you can improve, and three practical next steps you can put in place today.

Then track your progress. We survey your leadership and whole team at the start and end of your programme, and benchmark the results against the Spark AI Maturity Score™, so you can see the return on your investment.

Spark AI supports you at each stage of your transformation

Stage 4 isn't the finish line – the model grows with AI.

AI Foundations

Foundations: Create a shared language

4-hour session, big picture and hands on.

By the end of Foundations, everyone has the same level of understanding and solid skills to build on.

Context: The bigger picture understanding of how AI applies to agency work and how it's changing our landscape. What it takes to work with AI.

Skills: Hands on exercises to build skills and work with AI more effectively, suitable for everyone in your team.

AI Foundations

- Elevating skills: thinking differently, prompting well and using data.
- What is AI good at and bad at?
- How are agencies and brands using it?
- How do you use it responsibly at work? Data privacy, intellectual property, and bias.
- Where is it all going?

AI Accelerator Programme

AI Accelerator: from shared skills to shared practice

Each programme is tailored to you, and builds on the others to move you forwards.

AI for Leaders

Bookends the programme.

4 workshops to build a roadmap and activate it.

Sets the path.

AI Skills

Role – specific streams for specialists in your team.

Raises the ceiling.

AI for Leaders: Activate your vision

Three working sessions for your steering group and senior leaders. Then one final session to activate your AI taskforce to implement the change.

These sessions help turn your vision into a roadmap, define the governance and KPIs that will keep it on track, and mobilise a team to deliver it across the agency.

Runs in parallel with the Skills stream, so leadership decisions feed straight into delivery.

AI for Leaders

- Tools, data and agents – what leaders need to know
- Creating an AI roadmap aligned to your business strategy
- Mobilising the taskforce, and building an AI programme to deliver your roadmap
- How to build an AI-forward culture and lead the change
- Implementing AI policies and setting up governance processes
- Talking to clients and protecting your value.

Skills: role-specific streams, tailored to real work

1 day hands on training per stream, based on a brief relevant to your work.

Then half day follow up to build AI agents that support your process.

Client Services

Brief-writing, scoping and planning workflows, managing stakeholders and growing accounts. Not just to save time, but to raise quality.

Strategy

Research, synthesis, idea development, audience testing and storytelling. The ideas still come from you, but AI gets you there faster and improves outcomes

Creative

Image and motion workflows in Figma Weave. All the models, one canvas, repeatable workflows.

The power of Comfy UI accessible for everyone.

Operations

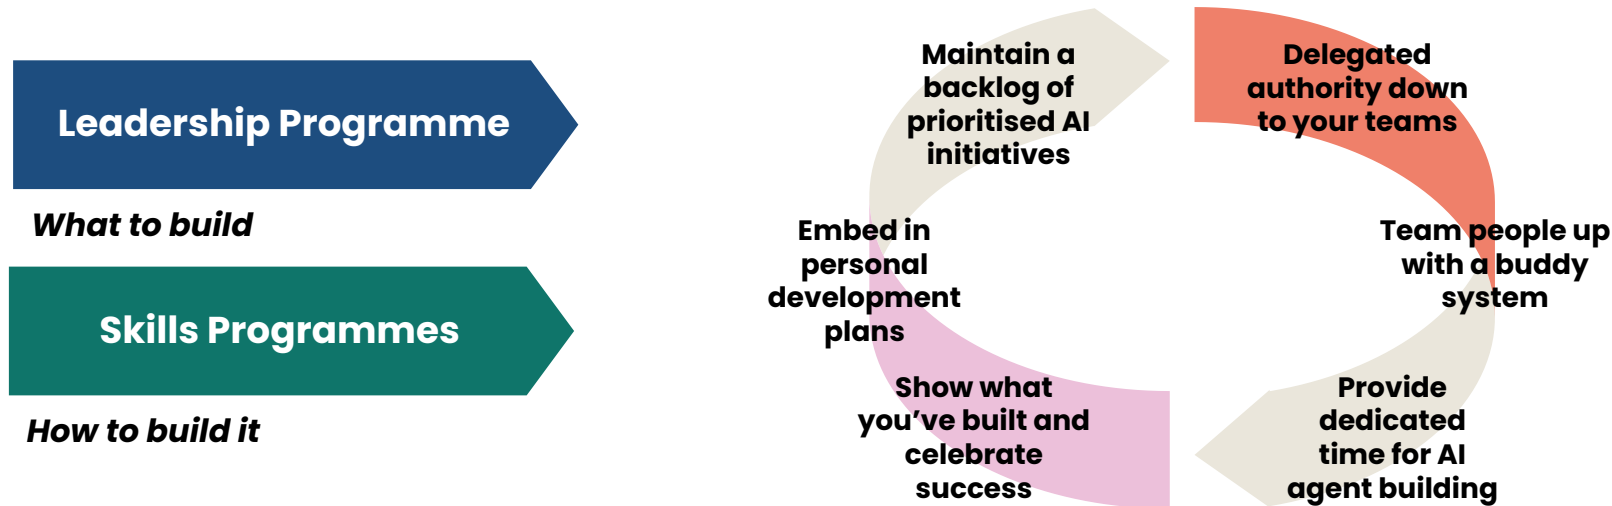

Automating manual reports, optimizing resource allocation, streamlining agency workflows, and integrating systems. Using AI to reduce overheads and scale delivery.

AI for Media Planners

Interrogating briefs, connecting channel logic, modelling scenarios and pressure-testing recommendations. A repeatable AI process from first brief to client narrative, with human judgement firmly at the centre.

Together these build lasting change in your agency

The Accelerator programme leaves you with a strategy for AI in your business, and the skills and culture to deliver it yourselves

The Spark Alumni Community

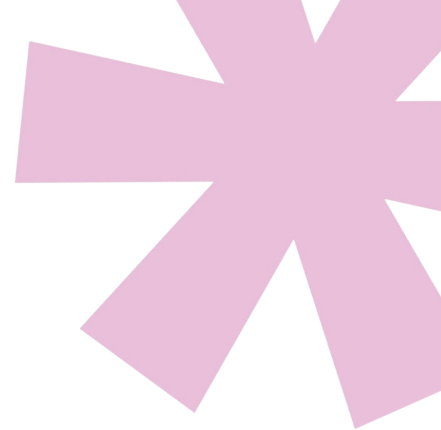

On completing the programme you'll be enrolled in our **free** online peer to peer community with other Spark clients.

- First access to new research and thought leadership from Spark
- Monthly live Office Hours with the Spark coaching team

And a peer network to:

- Share use cases
- Troubleshoot problems
- Ask advice and learn from each other

The Spark Team also actively moderate and answer questions.

AI workstream details

AI Foundations

Why?

Without a clear baseline, AI adoption fractures. Foundations gives every person in your organisation the same starting point – so the more advanced work that follows actually lands.

What is it?

A 4-hour, hands-on workshop.
In person or online.

Who is it for?

Your whole team.
All roles, all experience levels.
Leaders should join too, as it shows what AI is and isn't capable of and how to work with it.

What you'll cover

How AI works and where it's heading.

How leading agencies and brand teams are using it right now.

Hands-on prompting skills for practical, day-to-day tasks.

Responsible use: data privacy, IP, bias, environmental footprint, and client confidentiality.

Where AI does the heavy lifting – and where human judgement stays essential.

AI for Leaders

Why?

Our data consistently shows individuals are further ahead in AI adoption than the organisations they work in. That gap is a leadership problem.

This stream gives your leadership team the vision, the structure and the roadmap to embed AI in the way your agency works.

What is it?

3 workshops to build your AI strategy, mobilise your AI taskforce to execute it, and build an AI forward culture in the business. Optional online delivery breaks this into 4x 3 hour sessions.

Who is it for?

Founders, MDs, CEOs, HoDs.
Requires completion of AI Foundations and participation in one of the skills programmes.

What will we cover?

- Tools, data and agents – what leaders need to know
- Creating an AI roadmap aligned to your business strategy
- Mobilising the taskforce, and building an AI programme to deliver your roadmap
- How to build an AI-forward culture and lead the change
- Implementing AI policies and setting up governance processes
- Talking to clients and protecting your value.

AI for Client Services

Why?

Client expectations around AI are shifting fast.

This stream gives your client-facing team the knowledge to handle those conversations, and the confidence to use AI to improve every step of the client relationship.

What is it?

3x 3 hour online workshops. The first two focus on applying AI skills to value adding tasks specific to client service teams. The final 3-hour session to learn to build agents for real work.

Who is it for?

Account managers, client directors, and project managers.

Requires completion of AI Foundations.

What will we cover?

- Using AI to strengthen onboarding and proposal work
- How to navigate client conversations around IP, data privacy, and AI policy
- Building workflows and prompts around your most common client tasks
- Applying AI across the full client lifecycle, from pitch to retention
- Keeping human judgement and relationship intelligence at the centre

AI for Strategy

Why?

Over a third of agency staff are using AI for research and strategy.

This stream shows you how to use AI to go broader on research, deeper on insight, test ideas earlier, explore new strategic opportunities, and sell ideas back to your client.

What is it?

3x 3 hour online workshops. The first two focus on applying AI skills to value adding tasks specific to strategy teams. The final 3-hour session to learn to build agents for real work.

Who is it for?

Strategy teams, planners and insight leads. Requires completion of AI Foundations.

What will we cover?

Working on a brief that's tailored to your agency, we use AI to help:

- Use research techniques using Deep Research and Notebooks
- Generate insights across many sources using Notebooks
- Build out concepts and ideas and understanding when to use AI and when to use human judgement
- Stress test strategic thinking before the pitch and developing narratives
- Build custom AI assistants around your most common strategic tasks

AI for Creative

Why?

AI use in agency outputs has surged from 20% to 47% in the last six months. AI has moved from occasional tool to part of how creative work actually gets made.

This stream shows your team how to use that shift to its full potential.

What is it?

A full-day, hands-on workshop, followed by a half-day build day to build agents for real work. Also available online across three sessions of three hours each.

Who is it for?

Creative directors, designers, art directors, and creative producers. Valuable to anyone working in or alongside a creative team. Requires completion of AI Foundations.

What will we cover?

- Visual prompting, taking full directorial control of AI-generated imagery, animation and video
- Linking LLMs to image models to video models and building repeatable workflows in Figma Weave
- AI for common creative tasks - moodboarding, storyboarding, prototyping and previsualisation.
- AI for common production tasks - resizing, reskinning and more
- The confidence to use AI across every stage of the creative process
- Responsible use: IP and image rights

AI for Operations

Why?

Strong governance. Sharper checks. Systems that scale.

AI for Operations gives your team workflows that catch issues early and cut the friction from day-to-day running, allowing more room to focus on the work that moves things forward.

What is it?

Full day programme, followed by a half-day build day where your team applies what they've learned to their live work. Optional online delivery breaks this programme into 3x three hour sessions.

Who is it for?

The people responsible for keeping operations running smoothly, from day-to-day admin through to the systems leadership relies on.

What will we cover?

- Automating the admin around briefs, kick-offs, meetings, contact reports and wash-ups
- Using AI to protect margin and catch budget leakage before it bites
- Predicting delivery risk early, from staffing gaps to unrealistic timelines
- Matching people to projects on skills, seniority and capacity
- Turning data from across your systems into dashboards and leadership reports
- Automating operational admin while keeping human judgement on commercial and people risk

AI for Media Planners

Why?

Every decision has to hold together, even as assumptions go unchallenged and market conditions shift.

This stream gives your team a repeatable process for testing assumptions, comparing scenarios and building recommendations clients can trust.

What is it?

A full-day workshop, followed by a half-day build day using a live brief.

Also available online across three half-day sessions.

Who is it for?

Agency planning, investment and full-funnel planning teams.

In-house media, marketing and brand planning teams.

What will we cover?

- Diagnosing briefs and identifying objectives, constraints and unanswered questions
- Connecting channel roles across the funnel
- Modelling budgets, scenarios and trade-offs
- Pressure-testing recommendations before client review
- Building client-ready narratives and a Media Planning and Scenario Agent

Agent Build Sprint

Agent Build Sprint

Why?

Your team already uses AI for everyday tasks. The real value now is in agents that take on repeatable work and hold your brand knowledge.

This sprint gives your team the skills to build those agents themselves, and the confidence to keep building after we've gone.

What is it?

Two hands-on days, one week apart, in person. Day one you map opportunities and build first agents. The week between, refine them on real work. Day two, you play them back and plan how to govern them.

Who is it for?

Your agency or brand team, up to 12 people, working in small groups. No prior agent-building experience needed.

What will we cover?

- From prompting to agents
- The four types of agent, and where each fits your work
- Spotting the best opportunities, and what makes a strong use case
- Scoping your agent - what it does and how it will do it
- Curating the data that makes a brand agent genuinely useful
- Building agents in your own AI platform, hands on in pairs
- Testing for quality and refining
- Owning agents once they're live - version control, permissions, data privacy etc.

How the Agent Build Sprint runs

Day 1	The week between	Day 2	After the sprint
Map & build	Refine on real work	Refine and govern	Grow
Map the repeatable and brand-specific work across your studios, then build your first agents in pairs, in your own Copilot.	Put the prototype agents to work on live tasks. We stay on hand to help you refine them between the two days.	Each group plays back what they built. We troubleshoot together and raise the quality bar, so the agents are genuinely useful. Agree who owns each agent and how to keep it accurate.	Leave with a plan to grow your library over time.

Spark Frontier

Spark Frontier: Keep the momentum going

A yearly partnership, billed quarterly, that keeps your AI programme moving as the technology changes.

Coaching

Quarterly leadership workshops to set direction. Monthly coaching to maintain momentum.

Workflow Build

A library of pre-configured agentic workflows, tailored to each client, built in their own platform.

Super User Training

Deep skills for super users in creative, strategic and operational roles to fully exploit the latest technologies.

Trustmark

Certification for responsible AI use, to show clients you're using the tools - and their data - responsibly.

Community

An actively managed peer community of current and past clients, to share learnings and inspire progress.

Top Up Training

Yearly skills refresh for teams, to keep them up to date as the tools and platforms develop.

Why Spark?

We wrote the book on AI transformation for agencies

Shift – AI for Agencies

How to lead your team through the biggest shift since digital

"What sets 'Shift' apart is Jules Love's understanding that AI adoption is fundamentally about people, not technology. The book addresses the real barriers agencies face – time constraints, skill gaps, client concerns, and cultural resistance – with practical solutions that actually work. This is essential reading for any agency leader who wants to harness AI's power while preserving their team's creative spirit."

WHY SPARK

What our clients say

"The client was really impressed and said it was a good piece of work. We saved time and budget, but we also used it to critique our notes and ensure we stick to our core positioning."

Account Director, UK branding and creative agency

"It's bloody brilliant."

Jonny Spindler, UK CEO, JKR

"It's completely changed the way my team works."

Ciara Scannell, Strategy Director, Without

"I've become much more aware of what the strengths and weaknesses are, and I feel much more confident in what the human contribution is to all of this."

CEO and Co-Founding Partner, brand and design agency

"The programme was incredibly well delivered. You've held us to account, and we are seeing big ticks in every box for me."

Oli Lee, MD, Analogue

"The adoption and day-to-day usage of AI is now really high. It has become a normal tool within the business now, which is fantastic."

Chris Black, Co-Founder, Thirst

"Really good feedback on the training and it's really triggered innovation."

Estelle Wackermann, EMEA MD, Wolff Olins

"I just wanted to give the biggest thank you again to you and the SparkAI team - it's been a transformative program for our studio."

Layla Holland, Head of Creative, Event Concept

WHY SPARK

Built specifically for agencies

80+

Agencies have run Spark programmes since 2024.

#1

We literally wrote the book: *Shift: AI for Agencies*. Over 5,000 copies sold.

Oxford

Our Leadership programme forms part of the curriculum at Saïd Business School.

12

AI Coaches, ex-agency strategists, creatives, and client service
